1. Crear repositorio en nuestra cuenta GitHub

Para empezar, creamos el repositorio para la practica, en mi caso la llamare “Practica 1” (En la captura muestra que lo puse con tilde, pero lo modifiqué para que no hubiera problemas).

Create a new repository

A repository contains all project files, including the revision history. Already have a project repository elsewhere?
[Import a repository.](#)

Owner * Repository name *

VictorIMWEB / Práctica 1 ✓

Great repository names are short and unique. Your new repository will be created as Pr-ctica-1. about [special-train?](#)

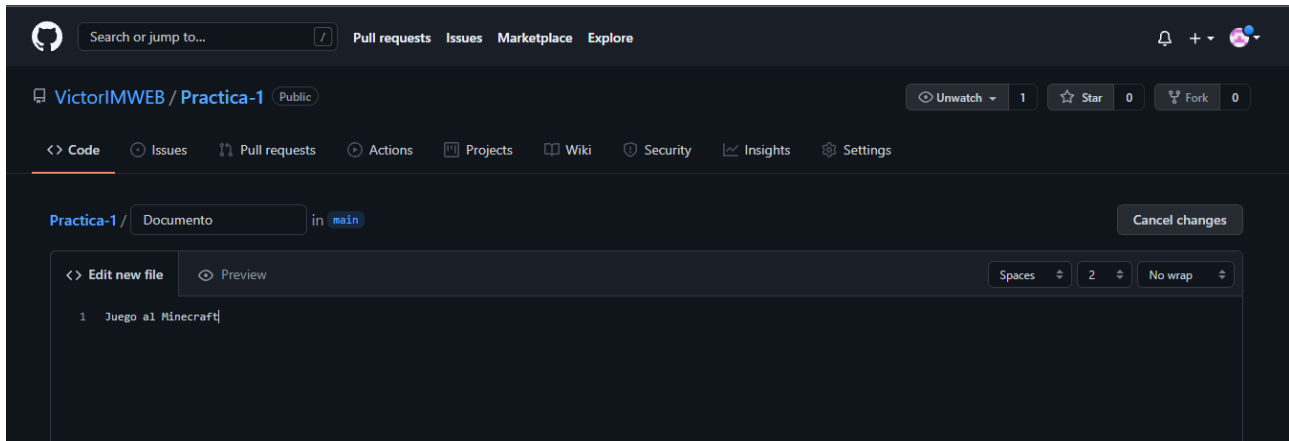

Description (optional)

☒ **Public**
Anyone on the internet can see this repository. You choose who can commit.

☐ **Private**
You choose who can see and commit to this repository.

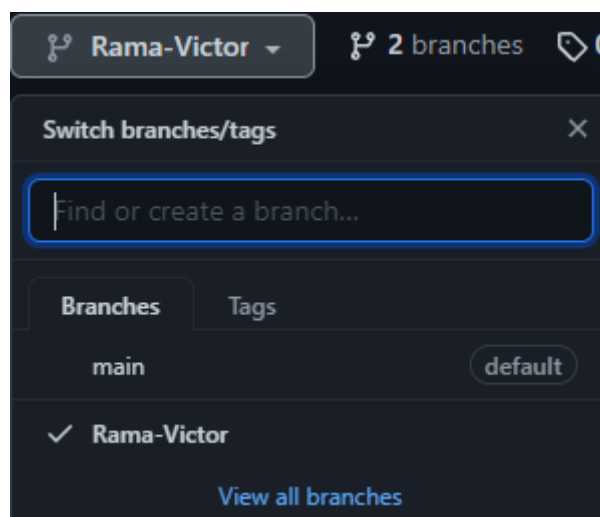

2. Crear un documento y subirlo a nuestro repositorio en la rama “master”

Creamos el documento, añadiremos texto y lo dejamos en la rama por defecto.

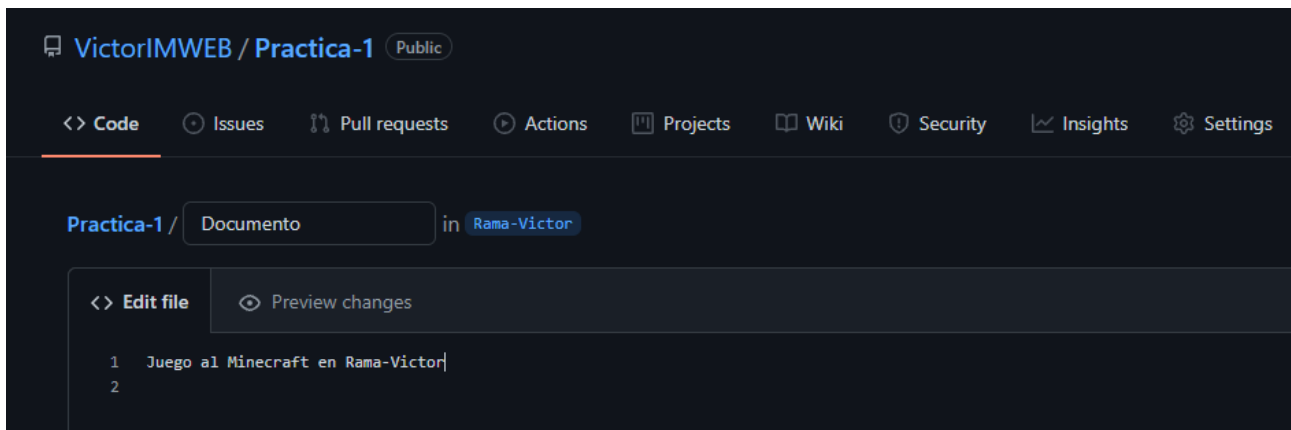

3. Crear una nueva rama

Crearemos la nueva rama, en mi caso le he puesto el nombre “Rama-Victor”.

4. Modificar el mismo documento y subirlo a la nueva rama

A continuación, modificaremos el documento, cambiando el texto y como podemos ver, la rama.

5. Unir las ramas, revisando posibles conflictos y sinergias

The screenshot shows a GitHub pull request interface. At the top, the title is "Update Documento #1". Below the title, it says "VictorIMWEB wants to merge 1 commit into main from Rama-Victor". There are tabs for "Conversation" (0), "Commits" (1), "Checks" (0), and "Files changed" (1). A comment from VictorIMWEB is visible, stating "No description provided." Below the comment, there is a commit titled "Update Documento" with a "Verified" status and a commit hash "e627b64". At the bottom, there is a green box containing two messages: "Continuous integration has not been set up" and "This branch has no conflicts with the base branch". A green button labeled "Merge pull request" is visible at the bottom left of the green box.

Update Documento #1

No description provided.

Update Documento Verified e627b64

Add more commits by pushing to the `Rama-Victor` branch on `VictorIMWEB/Practica-1`.

Continuous integration has not been set up
GitHub Actions and several other apps can be used to automatically catch bugs and enforce style.

✓ This branch has no conflicts with the base branch
Merging can be performed automatically.

Merge pull request You can also open this in GitHub Desktop or view command line instructions.
